

# DAPA & S. 744

## The Economic Benefits of Legalizing Immigrants' Presence

DECEMBER 2014

### **DAPA, Legalization & U.S. Economic Benefits<sup>1</sup>**

**DAPA not only will keep families together, it will also bolster our nation's economic growth,** a win-win for our country. In fact, DAPA will:

- Increase GDP by up to 0.9 percent, or an additional **\$90 to \$210 billion over 10 years.**
- Reduce the deficit by **\$25 billion** over 10 years.
- Grow the size of the American workforce and expand the American labor force by nearly **150,000 people** over 10 years.

**DAPA means that citizens will get a pay raise.** Given the stagnant minimum wage, it is good news that DAPA increases wages for all workers, citizens and immigrants alike. By 2024, annual wages for citizens will rise 0.3 percent, or approximately \$170 in today's dollars, with **no increase in unemployment for citizens.** This includes workers on the lower end of the pay scale.

**DAPA helps support vibrant local economies by bolstering the spending power of immigrant consumers.** This spurs our local economies and small businesses. As immigrants participate in the economy more fully and move freely across the labor market, their ability to spend increases.

**DAPA means more tax revenue for the federal government.** DAPA will raise an additional **\$3 billion in payroll taxes in the first year alone,<sup>2</sup> and \$22.6 billion over five years,** as both workers and employers get on the books and begin paying taxes for the first time.

### S. 744 & Economic Benefits<sup>3</sup>

**Legislative reform would generate even more economic benefits**—in addition to being a sustainable, long-term solution. If passed, S. 744 would:

- **Raise GDP by more than 5.4 percent** over the next 20 years and reduce the deficit by **\$832 billion**.<sup>4</sup>
- Increase tax revenues that dramatically outpace the bill's spending. **For every \$1 in spending that results from immigration reform, nearly \$2 will be paid in taxes.**
- **Give American workers a raise.** By 2033, the wages of all U.S. workers **would increase** by 0.5 percent due to the economic growth spurred by immigration reform.
- **Not increase unemployment.** The CBO determined that unemployment would not rise, since the significant economic growth resulting from the bill would create new jobs all across the country.

### Deportation & Our Economy<sup>5</sup>

**Mass deportation would not grow our economy.** In fact, it would cause citizens to lose their jobs and would lower everyone's wages.

- A 2014 analysis found that **legalization is much better for the domestic labor market** than deporting people is.
- An increase in immigrant deportations (with the aim of reducing undocumented immigrants by half) would actually **increase citizen unemployment by 1.6% and reduce citizen wages by .08 percent.**
- A legalization program would **decrease the unemployment rate for citizens** by 4 percent and **increase citizens' wages** by .19 percent.
